

Press Release

September 12, 2016

CardiacScan Imaging, a Mobile Imaging Company Headquartered in Tampa FL, earns Echocardiography Reaccreditation by the IAC.

Donna Bright, CEO, is pleased to announce that CardiacScan Imaging has earned Echocardiography reaccreditation by IAC.

Echocardiography is used to assess different areas of the heart and can detect heart disease or signs of serious cardiovascular conditions. Heart disease is the leading cause of death in the United States, followed closely by stroke as the fourth highest cause of death. According to the American Heart Association (AHA), more than 2,150 Americans die each day from cardiovascular disease which amounts to about one every 40 seconds.

There are many factors that contribute to an accurate diagnosis based on echocardiography. The training and experience of the sonographer performing the procedure, the type of equipment used and the quality assessment metrics each facility is required to measure, all contribute to a positive patient outcome. IAC accreditation is a “seal of approval” that patients can rely on as an indicator of consistent quality care and a dedication to continuous improvement.

CardiacScan Imaging, LLC located in Tampa, FL has been granted an additional three-year term of accreditation by the Intersocietal Accreditation Commission (IAC) in Echocardiography in the area(s) of Adult Transthoracic.

This latest accreditation awarded to CardiacScan Imaging demonstrates the facility’s ongoing commitment to providing quality patient care in echocardiography.

Accreditation by the IAC means that Comprehensive Cardiovascular Specialists CardiacScan Imaging has undergone an intensive application and review process and is found to be compliance with the published *Standards* thus demonstrating a commitment to quality patient care in echocardiography. Comprised of a detailed self-evaluation followed by a thorough review by a panel of medical experts, the IAC accreditation process enables both the critical operational and technical components of the applicant facility to be assessed, including representative case studies and their corresponding final reports.

IAC accreditation is widely respected in the medical community, as illustrated by

the support of the national medical societies related to echocardiography, which include physicians and sonographers. IAC Echocardiography is supported by the following organizations while operating independently of their activities: American Society of Echocardiography (ASE); Society of Diagnostic Medical Sonography (SDMS); and Society of Pediatric Echocardiography (SOPE).

When scheduling an echocardiography procedure, patients are encouraged to research the accreditation status of the facility and can learn more by visiting intersocietal.org/echo/main/patients.htm.

About IAC

IAC provides accreditation programs for vascular testing, echocardiography, nuclear/PET, MRI, diagnostic CT, dental CT, carotid stenting, vein treatment and management and cardiac electrophysiology. The IAC programs for accreditation are dedicated to ensuring quality patient care and promoting health care and all support one common mission: *Improving health*

care through accreditation[®]. To date, the IAC accrediting divisions have granted accreditation to more than 14,000 sites throughout the United States, Canada and Puerto Rico.
